

Research Practicum

Week Four

Miriam Golden

2 February 2021

1. Writing your PAPs, DMPs, and pre-registration document.
 - Why should you write a PAP?
 - What should your PAP include?
 - How should you write your PAP? (Hint: RMarkdown!)
2. Discussion of how to use RMarkdown to integrate code and text
 - Only one student submitted entire final exam in RMarkdown in joint ECO-SPS Causal Inference course! This means students do not understand and take advantage of RMarkdown's power.
3. Discussion of DeclareDesign
 - Why simulate your results in advance?
